College Of Science Awards Presented To Eight

COLLEGE STATION – Texas A&M University’s College of Science honored four faculty members, two staff members and two students at its annual fall meeting. The Association of Former Students’ College-Level Distinguished Achievement Awards were presented to Art Belmonte, a senior lecturer of mathematics, Simon North, associate professor of chemistry, David Toback, assistant professor of physics, and Emanuel Parzen, distinguished professor of statistics. Awards for outstanding staff achievement were presented to Carmen Rosas of the Chemistry Department and Tonna Harris-Haller of the Biology Department. The John B. Beckham Award in Science was presented to Benjamin Aurispa, a senior mathematics major, and Megan Lambert, a senior majoring in biology. Dean H. Joseph Newton presided at the program and gave his annual state-of-the-college address, citing successes in the faculty reinvestment initiative. He said a priority for the current year will be addressing graduate student issues, including tuition, fees and tuition remission.
